

Barcol-Air Air Distribution Products

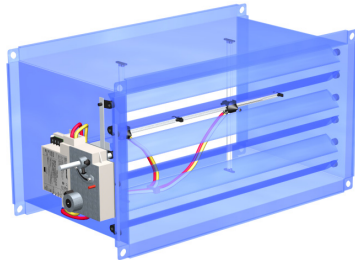

Throughout the world, Barcol-Air is involved in the sales and development of products for air distribution and control systems. The design of an optimum thermal indoor climate for today's modern building and working environment, forms the central pillar of Barcol-Air's philosophy. Invensys Barcol-Air is the only air distribution manufacturer in Europe that also manufactures its own temperature control and automation systems. Therefore our engineers think in systems, like the engineers we serve, and not just about products. This unique "one source, one responsibility" concept gives confidence to the client and less worries to the design team.

type: N A

Round single duct VAV terminals

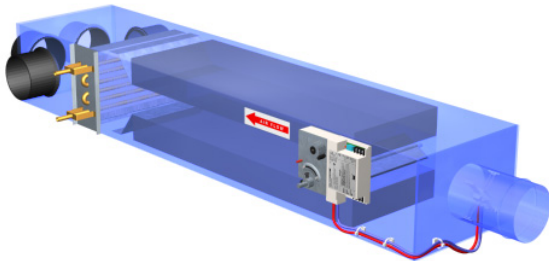

- For individual room temperature control
- Model 100 to 400
- Single or double wall construction

type: N K

Rectangular single duct VAV terminals

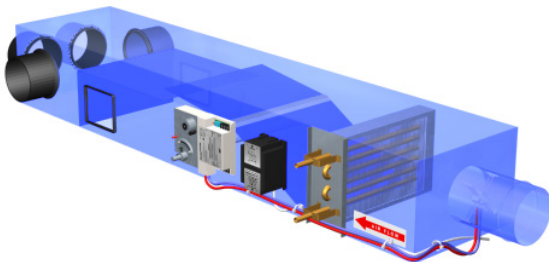

- For individual room temperature control
- Size 100x100 to 2000x1000 mm
- Single or double wall construction

type: N S

VAV terminals with integral silencer

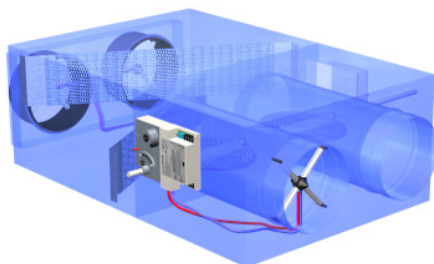

- For low noise requirements in high pressure or high velocity systems.
- Model 100 to 400

type: N V

Induction VAV terminals

- For comfortable air distribution in systems with high load variation
- Model 100 to 355

type: N Z

Dual duct terminals

- Model 100 to 400

Features of Barcol-Air VAV terminals

- ◇ FloCross averaging and amplifying air flow sensor
- ◇ Pressure independent
- ◇ Factory calibrated
- ◇ Very silent
- ◇ Compatible with all control systems
- ◇ Competitive pricing with standard controls (Invensys or Belimo)

type: NMV-D2M

Compact VAV controller with integral actuator

- 0-10 V or 2-10V control signal

type: MN FLO 3T

Compact VAV- and temperature controller with integral actuator

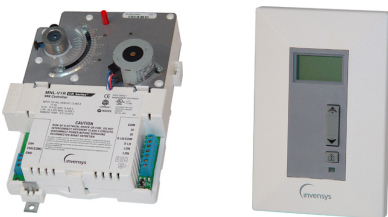

- Stand-alone or BMS application
- 3 digital outputs

type: MNL V2RV2

Compact VAV- and temperature controller with integral actuator

- 100% LON compatible
- Free programmable
- 3 digital outputs
- 1 analog output
- 1 digital input
- 1 universal input
